Lets Bash!

1. Write a bash program to print numbers from 10 to 20.
2. take two numbers as input and print their sum.
3. Write a bash script which takes arbitrary number of numbers and prints out their average. Example:
   $ ./average 10 20
   15
   $ ./average 10 20 11 19
   15
4. Search and discuss about /etc/passwd and /etc/groups and "groups" command. Write a shell script that takes a uid as an argument and prints out that person's name, home directory, shell and group number.
